SUMMARY

Full-Stack Developer proficient in all aspects of web design and development, from conceptualization and planning to back-end and front-end architecture, application testing, and deployment. Possesses a strong foundation in effective communication, collaborative teamwork, efficient time management, adept conflict resolution, inspiring leadership, and a dedicated work ethic. Continuously driven to expand skills and adapt to evolving technologies, striving to deliver innovative solutions that surpass expectations.

TECHNICAL SKILLS

Technologies: JavaScript, Python, HTML5, SQL, React.js, Cascading Style Sheet(CSS), Node.js, PostgreSQL, Express.js, REST APIs, Git, GitHub, Tailwind CSS, Jest, Vite

TECHNICAL PROJECTS

FullStack Developer | [La Placa Family bakery](#) | [GitHub](#)

April 2024

Summary: Developed a fully functional website for a pizzeria bakery business

- Collaborated with the client to gather requirements, iterate on design mockups increase customer satisfaction by 15%
- Designed and implemented responsive user interfaces, resulting in a 30% increase in mobile orders
- Deployed the application to a hosting environment for live use
- Worked on structuring components and UI layout to optimize user interaction
- Designed the user interface and user experience, including selecting color schemes and typography
- Tools: HTML, Tailwind CSS, React

FullStack Developer | **Personal Website** | [View Site](#)

Dec 2023

- Utilized Vite as a build tool introducing HMR, intelligent bundling, and cutting down build times by 20%
- Prepared the application for production-level deployment using a hosting environment called Netlify
- Chose color schemes, typography, and design elements to create a stunning UI/UX
- Architected the application's components to ensure good separation of concerns and high runtime speed
- Managed the application's state using React hooks and implemented routing using React Scroll
- Implemented proper semantic HTML elements to ensure better screen reader support
- Tools: HTML, Tailwind CSS, React, Netlify

FullStack Developer | **Capstone Project** | [GitHub](#)

Oct 2023

Summary: An e-commerce website offering meticulously crafted reproductions of famous paintings.

- Successfully executed the development of the front-end web application within a two-week timeframe
- Prepared the application for deployment to a hosting environment using Netlify
- Chose color schemes, typography, and design elements of the application
- Structured the application's components and UI layout
- Managed the application's state and implemented routing using React Hooks
- Implemented proper semantic HTML elements for better screen reader support
- Tools: HTML, Tailwind CSS, React, Netlify
